

# Softub® Patented Ozone Water Oxidizing System

For sparkling clean water!

## Concerned about harsh chemicals?

With Softub's Patented Ozone Water Oxidizing System, you can rest assured that you are getting sparkling clean water and using fewer chemicals.

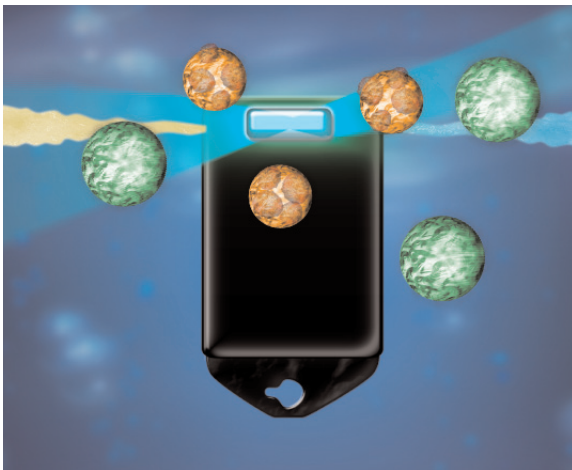

*Simple is Better!*

# Softub® Patented Ozone Water Oxidizing System

For sparkling clean water!

All Softub HydroMate™ units come with a built-in patented ozone system. In the Softub ozone system, ozone is distributed evenly through all jets as opposed to other spa manufacturers that utilize only 1 jet as a delivery port. This patented ozone delivery system is the only method that controls the ozone delivery throughout the entire body of water. The Softub ozone system uses a corona discharge system - which offers superior ozone production. The Softub ozone system is standard in all Softub models - compare this to other spa lines that charge \$400-\$600 for this feature.

**Chlorine attracts contaminants and dirt and then neutralizes it. That process renders the chlorine worthless.**

**The Softub ozone system broadcasts ozone into the entire body of water, which attaches to the dirty chlorine. This oxidizes the contaminant and makes the chlorine new again!**
